

TERBERG

TERBERG YT-TRACTORS
FOR ALL YOUR CARGO
AND LOGISTICAL SOLUTIONS

Terberg YT-tractors for all applications

Gross Combination Weight up to 200 tons

Lifting Capacity up to 36 tons

The Terberg approach to the design and manufacture of the YT-tractors is based on the following principles:

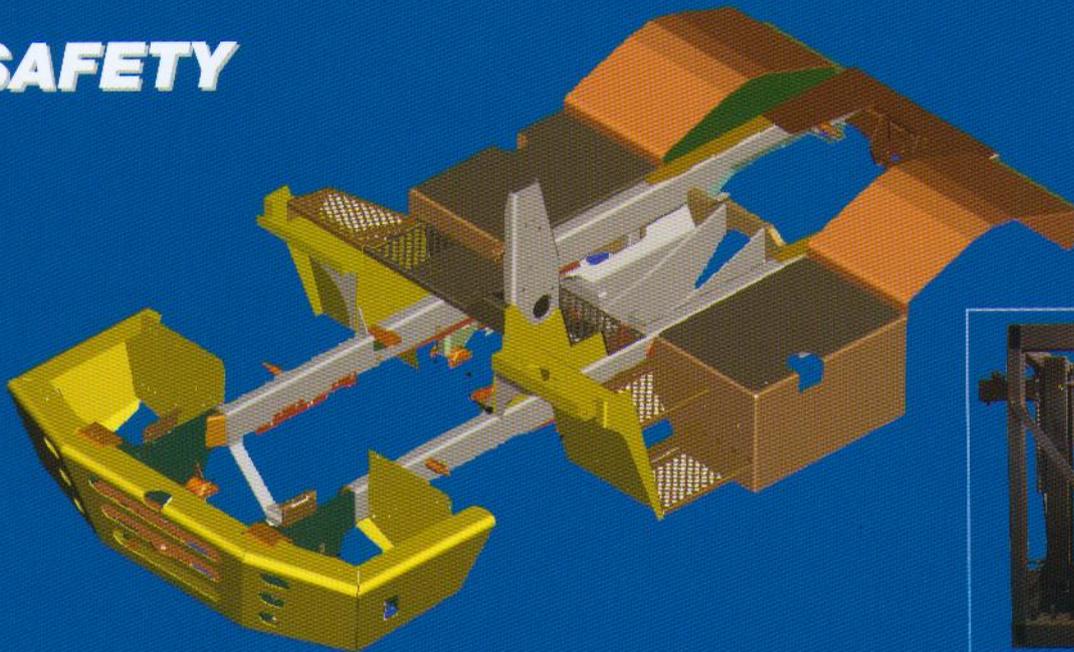

1. **Standardisation** : Terberg have developed a range of basic tractor specifications which utilise the maximum application of standard components throughout the range. Customers are able to select from a comprehensive range of optional extras to tailor the basic tractors to suit their specific operational requirements.
2. **K.I.S.S. - principle** : "Keep it safe and simple".
Wherever possible Terberg apply practical and proven engineering designs and techniques. Reliable components coupled with straight forward engineering, greatly reduces the risk of failures and minimises operating and maintenance costs.
3. **Reliability** : Terberg consider it essential to use reliable top quality components which are also internationally available.

The YT-range of 4x2-tractors is manufactured using top quality materials.

The tractors are also designed and engineered to optimise the following important features:

• Safety • Visibility • Performance • Driver comfort • Easy maintenance

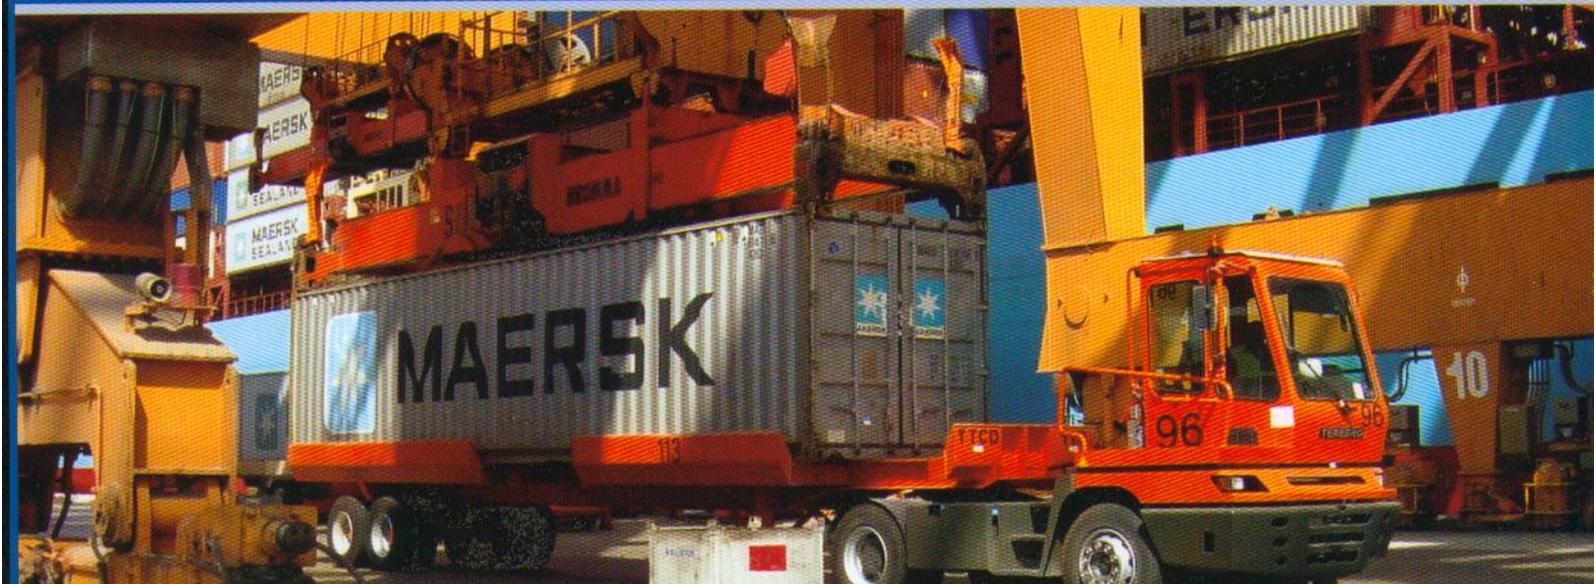

SAFETY

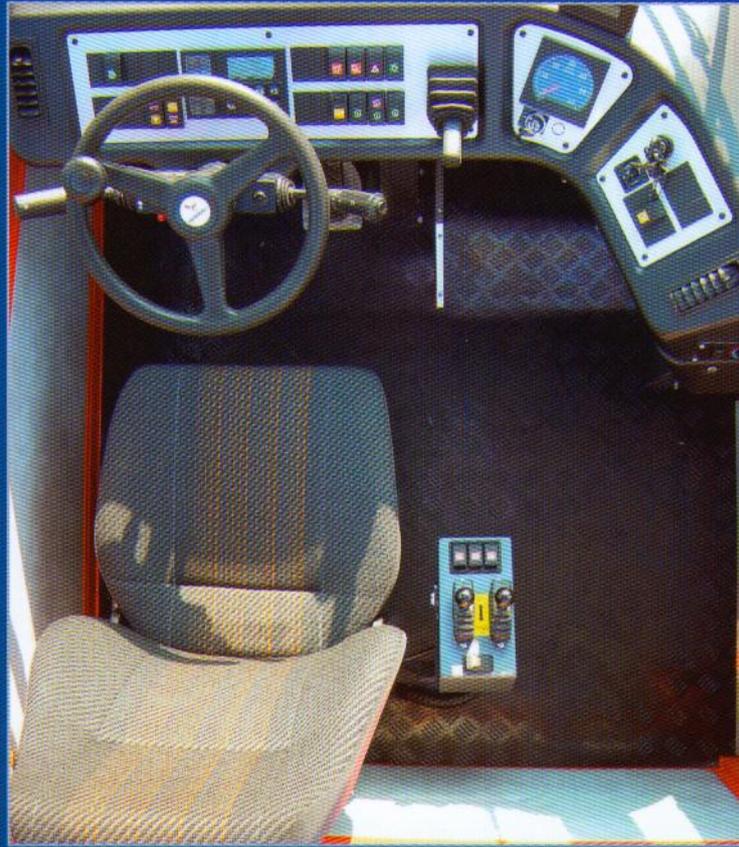

The fully welded chassis frame provides a perfect combination of strength, weight and easy access.

Strong, all steel cab structure (fully Fops & Rops tested), ensures maximum driver protection.

VISIBILITY

The increased interior cabin space offers a high degree of comfort and an excellent working environment for the driver.

Large windows for excellent driver visibility in all directions.

PERFORMANCE

Terberg YT-tractors are engineered and built to handle up to 200 tons G.C.W. and cope with 5th wheel loads up to 36 tons. The tractor range offers various (modular) driveline options, allowing operators to select the correct output and performance best suited to their particular requirements.

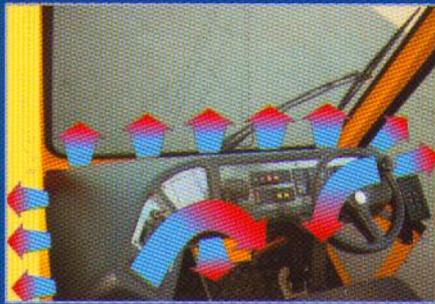

DRIVER COMFORT

Standard feature: inboard door offers safe and easy cab access from either side of the tractor.

Standard feature: sound insulation material to ensure low noise levels.

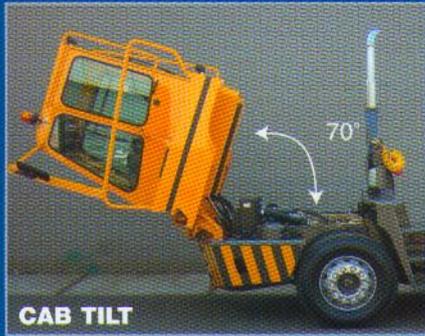

Cabin heating and (optional) cooling system with air supply to all directions

Optional : rear air suspension for extra driver comfort .

EASY MAINTENANCE ACCESS

CAB TILT

ENGINE OIL LEVEL

TRANSMISSION OIL LEVEL

COOLANT LEVEL

AIRFILTER EXCHANGE

BATTERIES AND AIR SYSTEM

HYDRAULIC LEVEL

ELECTRICAL ACCESS

Well identified P.C.B.'s / relays / fuses, all accessible in one central compartment.
